

Jig Saw Notes

- **Unplug it!** Always unplug the cord when making _____ or changing the blade.
- **Hold or clamp all work securely!** The portable jig saw only cuts on the _____ of the blade. If your work is not firmly clamped or held, it will jump and cause possible injury to you and the saw.
- **Too small?** Do not attempt to cut small pieces that can't be clamped or held _____.
- **Wait to remove.** Make sure the blade has stopped completely before _____ it from the cut.
- **Check it!** Some portable jig saws have a trigger lock. Always check to make sure the trigger is _____ before plugging the saw in.
- **Use the correct blade** for each job. _____ teeth = wood cutting blade; _____ teeth = metal cutting blade.
- **Cord saver.** Keep the cord out of the _____ of the saw.
