

Learn to Read a Ruler

TIP #1: The best thing to do is to memorize the lines. There really aren't that many when you figure that you already know $1/4$ ", $1/2$ " and $3/4$ ".

TIP #2: When in doubt, just count the lines (don't count zero), put your answer over 16 and reduce if you can.

TIP #3: The biggest complaint I hear from employers is that their new workers cant read a tape. YOU CAN DO IT!!!
