

- **Right blade?** Are teeth pointing \_\_\_\_\_? The saw blade must be the proper size for the job and the teeth must always point \_\_\_\_\_.
- **Tighten by hand only!** All chuck wing nuts and adjustment levers must be tightened by hand only. Never use \_\_\_\_\_ or pliers.
- **Make contact.** Adjust the hold-down foot so that it makes \_\_\_\_\_ contact with the work.
- **Flat bottomed only!** Cut only material that has a \_\_\_\_\_ surface on the bottom.
- **Safety First!** Make sure all \_\_\_\_\_ are in place.
- **Not too fast, not too slow.** Feed material into the machine at a \_\_\_\_\_ rate of speed.
- **Save your fingers.** Keep your fingers a minimum of \_\_\_\_\_ inches away from the blade.
